**Resonance vs. Articulation Quick Check**

Have the child imitate selected words or phrases based on linguistic ability level. Repeat again with the nose plugged if you think that nasal air escape occurred. Remember that nose plugging, like velopharyngeal management, corrects resonance, but not articulation. If a consonant normalizes with the nose plugged, the velopharynx should be evaluated. If a consonant does not normalize with the nose plugged, it should be addressed in articulation therapy.

**Stop Consonants:**
- Pop
- Bib
- Baby
- Bubble
- Paper
- Purple
- Purple paper
- Buy a puppy
- I bought purple paper
- Pack your backpack
- Pop a bubble.
- Big purple bug
- Toot
- Tight
- Daddy
- Did
- Too tight
- Daddy did it
- I did it, too
- Tell Dad to do it

**Fricative/Affricate Consonants:**
- Sissy
- Susie
- Zippers
- Easy
- Sissy sees it
- Suzie saw it
- Zippers are easy
- Shoes
- Shush
- Show
- Wash
- Shoes and socks
- You should wash
- Church
- Judge
- Jump
- Jump for joy
- The teacher at church
- Five
- Four
- Valve
- Four or five
- Four fire fighters
- They
- There
- There they are
