Supporting Children of Poverty: Special Considerations for the School-Based SLP
Angie Neal, MS, CCC-SLP

Moderated by:
Amy Natho, MS, CCC-SLP, CEU Administrator, SpeechPathology.com

Need assistance or technical support?

▪ Call 800-242-5183
▪ Email customerservice@SpeechPathology.com
▪ Use the Q&A pod
How to earn CEUs

- Must be logged in for full time requirement
- Log in to your account and go to Pending Courses
- Must pass 10-question multiple-choice exam with a score of 80% or higher
  - Within 7 days for live webinar; within 30 days of registration for recorded/text/podcast formats
- Two opportunities to pass the exam

Supporting Children of Poverty: Special Considerations for the School-Based SLP

Learning Outcomes

After this course, participants will be able to:

- Explain how poverty can negatively impact language learning and academic success.
- Identify 3-5 considerations that are important to share with school teams related to the impact of poverty on academic success.
- List at least five ways to improve students’ depth of vocabulary knowledge.
If children come to us from strong, healthy, functioning families, it makes our job easier.

If they do not come to us from strong, healthy, functioning families, it makes our job more important.

- Barbara Colorose

---

**Academic Impacts of Poverty**

- Poverty is one of the strongest predictors of reading achievement. For the United States as a whole, 27% of 4th grade students scored below basic on the NAEP assessment; however, for children falling below the poverty level, the percentage was 34.6% (NAEP, 2005)

- About 16% of children who are not reading proficiently by the end of third grade do not graduate from high school on time, a rate four times greater than for proficient readers. For those children who were poor for at least a year and were not reading proficiently, the proportion failing rose to 26%. For children who were poor, lived in neighborhoods of concentrated poverty and not reading proficiently, the proportion jumped to 35% (Hernandez, 2012)
Why Does Poverty Affect Reading?

- Oral language lays the foundation for written language.
- Children who begin elementary school with deficits in their **vocabulary** knowledge are at risk for reading failure and academic underachievement (Catts, Adolf & Weismer, 2006; Marzano, 2003; Nagy, 2005).
- … students from low SES backgrounds are more likely to arrive at school having heard far fewer words, and **therefore having fewer words in this phonological lexicon**. Couple this with the fact that exposure to words in the preschool years also promotes phonological awareness (Burgess, Hecht & Lonigon, 2002; Metsala, 2011), assuming no genetically based phonological-core deficit, and the reasons for the **reading gap** between low SES and high SES students come into sharper focus (Kilpatrick, 2015).

Let’s Try It…
(from Closing the Vocabulary Gap by Alex Quigley)

______ is marking a ____ on a measuring _____.
This involves ____ the relationship between _______ of a measuring ____ and _____ or _________ ________, which must be _____. For example, placing a ____ in melting ice to see whether it reads zero, to check it has been ____ correctly.
How About Now?

_____ is marking a scale on a measuring instrument. This involves establishing the relationship between indications of a measuring instrument and standard or reference values, which must be applied. For example, placing a thermometer in melting ice to see whether it reads zero, to check it has been _____ correctly.

*A person needs to know about 95% of the words. The other 5 percent of word meanings can then be inferred from context.

What This Looks Like Over Time

- In 1990 - Chall found that low-income students in 2nd and 3rd grade tended to score around average in national reading tests, but in 4th grade they began to drop and continued to drop as they progressed to higher grades BECAUSE… tests in earlier grades focused on decoding NOT vocabulary knowledge.

- High performing 1st graders, know TWICE as many words as low SS students. This only gets MAGNIFIED as they progress through the grades… why, because of the growth of vocabulary that COMES from reading text/reading comprehension.

- Children of poverty start school with significantly less word knowledge than same age peers. The difference is as much as a 35,000 word gap that gets magnified each year, resulting in high-performing 12th grade students knowing about four times as many words as the low performing 12th graders (Hart & Risley, 1995).
The Matthew Effect

- We can’t teach Low SES/Low Language Environment students the same way as other students...

On NOT Using the Dictionary to Teach Vocabulary

- There is no research that exists that indicates a positive effect from looking up words in a traditional dictionary.
- A dictionary definition does is not the same thing as knowing a word.
Low SES and Trauma

- How trauma affects the skills needed for academic success
  - Organization
  - Memory
  - Ability to produce work
  - Engagement in learning
  - Self regulation
  - Emotional regulation
  - Attention to task
  - Task perseverance
  - Getting information into long term memory
  - Impact on play skills that impacts problem solving
  - Understanding cause-effect relationships
  - Perspective taking and empathy

Interprofessional practice occurs when multiple service providers from different professional backgrounds provide comprehensive healthcare or educational services by working with individuals and their families, caregivers, and communities to deliver the highest quality of care across settings. (ASHA)

- Reading at home…

A child who reads 20 minutes a day will hear 1,800,000 words per year. They will have read for 851 hours by 6th grade and on standardized tests, they will likely score better than 90% of their peers.

A child who reads 5 minutes a day will have heard 282,000 words per year and score better than 50% of their peers.

A child who reads for 1 minute a day will have heard 8,000 words and score better than only 10% of their peers.

Whoa, Slow and Go Words

- Whoa! I don’t think I’ve heard that word before!
- Slow down – I think I have heard it, what does it mean? Does it make sense here?
- Go – I know you! You mean _____.
Word Sorts

- Hardest
- Easiest
- Favorite
- Least favorite

Language of the Standards

- To **REVISE** is to make sure it sounds right and make changes.
- **PUNCTUATION MARKS** are periods, question marks, and exclamation points.
- **PERIODS** go after telling sentences.
- **QUESTION MARKS** go after asking sentences.
- A **SENTENCE** is complete thought.
- **CAPITALIZATION** is the use of uppercase letters for the first word in a sentence, special names and the word I.
- To **PRINT LEGIBLY** is to write neatly for others to read.
- **COMPLETE SENTENCES** are complete thoughts using nouns and verbs.
- **MEDIAL SOUNDS** are the sounds in the middle of a word.
- **PREWRITING STRATEGIES** are making lists, charts, or brainstorming.
- **WORD FAMILIES** are words that are built from the same basic word.
- **BASE WORDS** are words before you add an ending.
Also…

- Reading books aloud
- Etymology (word origins)
- Figurative language
- Teaching Greek and Latin Roots
- Pre-teaching vocabulary BEFORE reading (great accommodation to put on IEP)
- Conversation starters with Tier 2 vocabulary (TPT, Speech Time Fun)
- Synonyms/Antonyms
- Compare/Contrast
